# Pretraživanje elektronskih časopisa po naslovu, naučnoj disciplini i ključnim rečima

Tatjana Timotijević  
<http://kobson.nb.rs>

Beograd, oktobar 2015.

# Teme

- Pretraživanje časopisa po naslovu
- Pretraživanje časopisa po naučnoj disciplini
- Pretraživanje po temi (ključnim rečima) - pojedinačno i objedinjeno
- Pretraživanje baza sažetaka i citata (Medline, Scopus, WoS)

## Servisi

U 2009. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, oko 40.000 naslova knjiga, kao i nekoliko indeksnih baza podataka.

Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu je dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta.

Za predmetna pretraživanja po člancima upućujemo Vas ili na nekog od agregatora, ili direktno na sajt izdavača.

### Pretraživanje časopisa:

Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovima časopisa koji su imali Impakt Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo pokazatelj njegove dostupnosti, a nikako kvaliteta.

### Elektronski časopisi:

Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

## Podaci o časopisu

ISSN	0022-0000
Naslov	Journal of Computer & System Sciences
Status	Active
Tip dokumenta	Academic/Scholarly
Učestalost	8 times a year
Jezik	Text in English
Prvi broj	1967
Abstrakt	Publishes original research papers on computer science and in system science, with emphasis on pertinent mathematical theory and its applications.
Alternativni naslovi	Online "Full" text edition; ISSN 1090-2724

## U bibliotekama Srbije (u COBISS-u)

Od - do	Biblioteka	Brojevi telefona
1984-1993	Institut "Mihajlo Pupin", BEOGRAD	2755-171, 2776-222 lok 309
1984-1988	Institut za nuklearne nauke "Vinča", VINČA	2458-222; 2440-871/lok 755,409, 547, 758, 347, 3440-100

## Myeloma Propagating Cells, Drug Resistance and Relapse

ANASTASIOS KARADIMITRIS,<sup>a,b</sup> ARISTEIDIS CHAIDOS,<sup>a,b</sup> VALENTINA CAPUTO,<sup>a</sup> KATERINA GOUDEVENOU,<sup>a</sup> KANAGARAJU PONNUSAMY,<sup>a</sup> XIAOLIN XIAO<sup>a</sup>

**Key Words.** B lymphocytes • Cancer • Cancer stem cells • Stem cell plasticity • Xenotransplantation • Hematologic malignancies • Flow cytometry • Epigenetics

**ABSTRACT**

Multiple myeloma (MM) is an incurable tumor of the plasma cells, the terminally differentiated immunoglobulin secreting B lineage cells. The genetic make-up of MM has been extensively characterized but its impact on the biology of the disease is incomplete without more precise knowledge of the identity and functional role of cells with multiple myeloma propagating activity (MMPA). We review here recent data that link MMPA with myeloma clonotypic populations organized in a cellular hierarchy that mirrors normal B cell development and also with drug resistance and disease relapse. We further propose a conceptual framework which, with optimal use of recent technological advances in genomics and phenomics, could allow dissection of the cellular and molecular properties of cells with MMPA, drug resistance and in vivo relapse in an integrated and patient-specific manner. There is real hope that these approaches will significantly contribute to further improvements in disease control, overall survival, and possibly cure of patients with MM. *STEM CELLS* 2015;33:3205–3211

**SIGNIFICANCE STATEMENT**

In this review article we attempt to provide an integrated view of the data that link multiple myeloma propagating cells (MMPC) with drug resistance and disease relapse. We also provide a blueprint for a tri-dimensional study of MMPC and drug resistance in myeloma patients i.e., diagnosis vs remission/relapse; bone marrow vs distant disease and within the cellular architecture of the tumour itself by utilizing the unprecedented power of the new high throughput technologies. It is hoped that such approaches will contribute in the more in-depth understanding of the mechanisms that sustain survival and growth of myeloma cells and will identify new therapeutic targets.

The screenshot displays the KoBSON website interface. At the top right, there is a search bar and navigation links: "Tražite", "Udaljeni pristup", "Mapa sajta", and "Odjava". The KoBSON logo is on the left, with the IP address "IP: 147.91.1.45, KoBSON" below it. The main navigation bar includes "CPT", "SRL", "EleČas", "EleKnjige", "Naši u WOS", "Pomoć", and "Impresum". A secondary navigation bar on the left lists various services, with "Elektronski časopisi" highlighted in a yellow circle. The central content area is titled "Servisi" and contains text about search capabilities in 2009, a note on search criteria, and a list of "Elektronski časopisi". A right-hand sidebar contains a list of links, with "Brza stranica" highlighted in a yellow circle. Social media icons for Facebook, Twitter, and YouTube are also visible.

### Servisi

U 2009. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, oko 40.000 naslova knjiga, kao i nekoliko indeksnih baza podataka.

Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu je dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta.

Za predmetna pretraživanja po člancima upućujemo Vas ili na nekog od agregatora, ili direktno na sajt izdavača.

**Pretraživanje časopisa:**  
Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovima časopisa koji su imali Impakt Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo pokazatelj njegove dostupnosti, a nikako kvaliteta.

**Elektronski časopisi:**  
Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

- ❖ Pravne nauke HE
- ❖ Sve naučne discipline SD, EB, CU

# Agregatori i izdavači

## Dostupni izdavači:

AC, AP, CU, EM, IOP, OX, SG, SD, SP, WI,  
ASME, RSC

(puni tekstovi članaka često dostupni el. pre njihovog štampanja u papirnoj formi)

## Dostupni agregatori:

EB, FM, HE, HW, JS, TE

(baze koje sadrže časopise više izdavača, često sadrže "embargo" period 3, 6 ili 12 meseci)

# Bulovi operatori

AND	Finds documents containing all of the specified words or phrases. Peanut AND butter finds documents with both the word peanut and the word butter.
OR	Finds documents containing at least one of the specified words or phrases. Peanut OR butter finds documents containing either peanut or butter. The found documents could contain both items, but not necessarily.
AND NOT	Excludes documents containing the specified word or phrase. Peanut AND NOT butter finds documents with peanut but not containing butter. NOT must be used with another operator, like AND.
NEAR	Finds documents containing both specified words or phrases within 10 words of each other. Peanut NEAR butter would find documents with peanut butter, but probably not any other kind of butter.
*	The asterisk is a wildcard; any letters can take the place of the asterisk. Bass* would find documents with bass, basset and bassinet. You must type at least three letters before the *. You can also place the * in the middle of a word. This is useful when you're unsure about spelling. Colo*r would find documents that contain color and colour.

# Pretraživanje po temi ili ključnim rečima

The screenshot displays the EBSCO website interface. At the top, there are navigation tabs: CPT, SRL, EleČas, EleKnjige, Naši u WOS, Pomoć, and Impresum. On the left side, there is a vertical menu with categories like KoBSON, INFORMACIJE, NAUKA U SRBIJI, and SERVISI, followed by a list of journals and publishers such as American Chemical Society, American Physical Society, and JSTOR.

The main content area is titled "EBSCO" and "Izdavač: EBSCO Publishing". It features two search options: "iz akademske institucije" (with a note "(podešavanje Proxy servera)") and "udaljeni pristup" (with a note "(o pristupu kod kuće)"). The "udaljeni pristup" option is circled in purple. Below this, there is a section for "Brzo pretraživanje" (Fast searching) with a descriptive paragraph and a "Research databases" search box containing the EBSCO logo, a search input field, and a "Search" button.

On the right side, there is a sidebar with various utility links, including "NOVI KORISNICI", "KAKO KORISTITI KoBSON", "KOBSON ZA POČETNIKE", and "SKRAĆENICE NA KoBSONu".

**EBSCO**  
Izdavač: EBSCO Publishing

<b>iz akademske institucije</b> (podešavanje Proxy servera)	<b>udaljeni pristup</b> (o pristupu kod kuće)
--	--

**Brzo pretraživanje**  
Najbrži pristup servisu iz akademske institucije. Ukoliko pretražujete izvan akademske mreže servis će Vas prepoznati kao "guest user", te Vam neće biti dostupni puni tekstovi. U tom slučaju koristite opciju udaljeni pristup.

**Research databases**

EBSCO  
  
Search

**O servisu**  
Agregatori su proizvođači baza podataka koji referišu časopise više izdavača, čime ih čine dostupnim za objedinjeno pretraživanje. Njihova prednost je i u tome što u sebe uključuju i časopise manjih izdavača, koji su jedino na ovaj način dostupni.

**Academic Search Premier**

This multi-disciplinary database provides full text for more than 4,600 journals, including full text for nearly 3,900 peer-reviewed titles. PDF backfiles to 1975 or further are available for well over one hundred journals, and searchable cited references are provided for more than 1,000 titles.

[Title List](#) [More Information](#)

**Business Source Premier**

*Business Source Premier* is the industry's most used business research database, providing full text for more than 2,300 journals, including full text for more than 1,100 peer-reviewed titles. This database provides full text back to 1886, and searchable cited references back to 1998. *Business Source Premier* is superior to the competition in full text coverage in all disciplines of business, including marketing, management, MIS, POM, accounting, finance and economics. This database is updated daily on EBSCOhost.

[Title List](#) [More Information](#) [Enhanced Business Searching Interface](#)

**ERIC**

*ERIC*, the Education Resource Information Center, provides access to education literature and resources. The database contains more than 1.3 million records and provides access to information from journals included in the *Current Index of Journals in Education* and *Resources in Education Index*.

[More Information](#)

**Health Source - Consumer Edition**

This database is the richest collection of consumer health information available to libraries worldwide, providing information on many health topics including the medical sciences, food sciences and nutrition, childcare, sports medicine and general health. *Health Source: Consumer Edition* provides access to nearly 80 full text, consumer health magazines.

Get rights and content

Mouse embryonic fibroblasts (MEFs) are commonly used as feeder cells for the generation of human induced pluripotent stem cells (hiPSCs). However, medical applications of cell derivatives of hiPSCs generated with a MEF feeder system run the risk of having xenofactor contamination due to long-term cell culturing under an animal factor-containing environment. We developed a new method for the derivation of human fibroblast-like cells (FLCs) from a previously established hiPSC line in an FLC differentiation medium. The method was based on direct differentiation of hiPSCs seeded on Matrigel followed by expansion of differentiating cells on gelatin. Using inactivated FLCs as feeder layers, primary human foreskin fibroblasts were successfully reprogrammed into a state of pluripotency by Oct4, Sox2 Klf4, and c-Myc (OSKM) transcription factor genes, with a reprogramming efficiency under an optimized condition superior to that obtained on MEF feeder layers. Furthermore, the FLCs were more effective in supporting the growth of human

## Kratko uputstvo o pretraživanju

Pretraživanje baze TEEAL moguće je na dva načina:

1. - unesite reči ili prva slova reči razdvojene razmakom (corn biochem); možete koristiti Bulove operatore, a ukoliko ih ne navedete podrazumevani operator je AND. Reči se pretražuju iz naslova, ključnih reči i sažetaka. - i/ili unesite prezime ili prva slova prezimena autora - i/ili izaberite sa liste naslov časopisa
2. - Sadržaje časopisa ovog servisa možete naći ovde '. Sadržaj svih brojeva izabranog časopisa (od 1993. godine) dobićete kada kliknete na časopis sa liste. Nakon obavljenog pretraživanja rezultati se prikazuju u formi tabele sa sledećim kolonama: - naslov rada - autori - info (naziv časopisa, godina, volumen, broj i stranice) Ako kliknete na Detalji dobićete i ključne reči i sažetak tog rada. Ako želite puni tekst rada kliknite na Članak, zatim upišite mail adresu na koju želite da vam pošaljemo članak i kliknete na Pošalji.

Naslov	Carbon accumulation in cotton, sorghum, and underlying soil as influenced by tillage, cover crops, and nitrogen fertilization
Autor(i)	Sainju U M Whitehead W F Singh B P
Abstract	<p>soil and crop management practices may influence biomass growth and yields of cotton (<i>Gossypium hirsutum</i> L.) and sorghum (<i>Sorghum bicolor</i> L.) and sequester significant amount of atmospheric CO<sub>2</sub> in plant biomass and underlying soil, thereby helping to mitigate the undesirable effects of global warming. This study examined the effects of three tillage practices [no-till (nt), strip till (st), and chisel till (ct)], four cover crops [legume (hairy vetch) (<i>Vicia villosa</i> Roth), nonlegume (rye) (<i>Secale cereale</i> L), hairy vetch/rye mixture, and winter weeds or no cover crop], and three N fertilization rates (0, 60-65, and 120-130 kg N ha<sup>-1</sup>) on the amount of C sequestered in cotton lint (lint+seed), sorghum grain, their stalks (stems+leaves) and roots, and underlying soil from 2000 to 2002 in central Georgia, USA. A field experiment was conducted on a dothan sandy loam (fine-loamy, kaolinitic, thermic, plinthic kandicudults). In 2000, C accumulation in cotton lint was greater in nt with rye or vetch/rye mixture but in stalks, it was greater in st with vetch or vetch/rye mixture than in ct with or without cover crops. Similarly, C accumulation in lint was greater in nt with 60 kg N ha<sup>-1</sup> but in stalks, it was greater in st with 60 and 120 kg N ha<sup>-1</sup> than in ct with 0 kg N ha<sup>-1</sup>. In 2001, C accumulation in sorghum grains and stalks was greater in vetch and vetch/rye mixture with or without N rate than in rye without N rate. In 2002, C accumulation in cotton lint was greater in ct with or without N rate but in stalks, it was greater in st with 60 and 120 kg N ha<sup>-1</sup> than in nt with or without N rate. Total C accumulation in the above- and belowground biomass in cotton ranged from 1.7 to 5.6 mg ha<sup>-1</sup> and in sorghum ranged from 3.4 to 7.2 mg ha<sup>-1</sup>. Carbon accumulation in cotton and sorghum roots ranged from 1 to 14% of the total C accumulation in above- and belowground biomass. In nt, soil organic C at 0-10 cm depth was greater in vetch with 0 kg N ha<sup>-1</sup> or in vetch/rye with 120-130 kg N ha<sup>-1</sup> than in weeds with 0 and 60 kg N ha<sup>-1</sup> but at 10-30 cm, it was greater in rye with 120-130 kg N ha<sup>-1</sup> than in weeds with or without N rate. In st, soil organic C at 0-10 cm was greater in rye with 120-130 kg N ha<sup>-1</sup> than in rye, vetch, vetch/rye and weeds with 0 and 60 kg N ha<sup>-1</sup>. Soil organic C at 0-10 and 10-30 cm was also greater in nt and st than in ct. Since 5 to 24% of C accumulation in lint and grain were harvested, C sequestered in cotton and sorghum stalks and roots can be significant in the terrestrial ecosystem and can significantly increase C storage in the soil if these residues are left after lint or grain harvest, thereby helping to mitigate the effects of global warming. Conservation tillage, such as st, with hairy vetch/rye mixture cover crops and 60-65 kg N ha<sup>-1</sup> can sustain C accumulation in cotton lint and sorghum grain and increase C storage in the surface soil due to increased C input from crop residues and their reduced incorporation into the soil compared with conventional tillage, such as ct, with no cover crop and N fertilization, thereby maintaining crop yields, improving soil quality, and reducing erosion</p>
Description	carbon. chiselling. cotton. cover-crops. leaves. lint. nitrogen-fertilizers. no-tillage. roots. rye. sandy-loam-soils. soil-organic-matter. soil-types. stems. tillage. weeds

# Pretraživanje baza sažetaka i citata - Medline, Scopus, Web of Science

The screenshot displays the KoBSON website interface. At the top, there are navigation tabs: CPT, SRL, Elečas, EleKnjige, Naši u WOS, Pomoć, and Impresum. On the right side, there are social media icons for RSS, @, and a phone icon.

**Servisi**

**Servisi**

U 2009. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, oko 40.000 naslova knjiga, kao i nekoliko indeksnih baza podataka.

Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu je dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta.

Za predmetna pretraživanja po člancima upućujemo Vas ili na nekog od agregatora, ili direktno na sajt izdavača.

**Pretraživanje časopisa:**

Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovima časopisa koji su imali Impakt Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo pokazatelj njegove dostupnosti, a nikako kvaliteta.

**Elektronski časopisi:**

Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

# Pretraživanje abstraktne baze Medline

The screenshot shows the KoBSON website interface. At the top right, there are navigation links: [Tražite](#), [Udaljeni pristup](#), [Mapa sajta](#), and [Odjava](#). The KoBSON logo is on the left, with the IP address 147.91.1.45, KoBSON below it. A breadcrumb trail reads [Početak](#) / [SERVISI](#) / [Indeksne baze](#) / . Below the breadcrumb, there are tabs for [EleČas](#), [EleKnjige](#), [Naši u WOS](#), [Pomoć](#), and [Impresum](#). On the left side, a vertical menu under the 'SERVISI' tab lists various services, with 'Medline' highlighted by a yellow circle. The main content area, titled 'Indeksne baze', contains the following text: 'Indeksne baze podataka sadrže bibliografske podatke o radovima iz časopisa koji su u njima zastupljeni. Za svaki članak dati su detaljni podaci:' followed by a bulleted list: '• autor rada i institucija', '• naslov rada', '• naziv časopisa', '• godina', '• jezik rada', '• tip rada', and '• sažetak'. Below the list, it states: 'Ukoliko zapis obuhvata i popis korišćene literature, takve baze nazivamo citatnim (*Web of Science, Scopus, Srpski citatni indeks*).' On the right side, there are social media icons and a sidebar with sections: 'NOVI KORISNICI' (with sub-items 'Ko ima pravo pristupa' and 'Kome je KoBSON dostupan'), 'KAKO KORISTITI KoBSON' (with sub-items 'Pretraživanje časopisa', 'Pretraživanje Naši u WoS', and 'Kako 'od kuće' do KoBSON-a'), 'KoBSON ZA POČETNIKE', 'ČESTA PITANJA O:' (with sub-items 'Dostupnosti KoBSON-a', 'Naši u WoS', 'Našim časopisima', and 'Citiranosti autora'), and 'SKRAĆENICE NA KoBSONu'.

## Pretraživanje abstraktne baze Medline

- ❖ US National Library of Medicine
- ❖ 5 200 časopisa
- ❖ Oko 16 miliona referenci za period 1949 do danas
- ❖ Svaki članak se indeksira u kontrolisanom rečniku Medical Subject Headings - MeSH - 24.500 odrednica, hijerarhijski uređenih na devet nivoa
- ❖ Veliki broj radova se može dobiti i u punom tekstu (uslovljen je pretplatom)

# Pretraživanje abstraktne baze Medline

The screenshot shows the Medline website interface. At the top, there are navigation tabs: CPT, SRL, EleČas, EleKnjige, Naši u WOS, Pomoć, and Impresum. On the left side, there is a green sidebar menu with various options like 'KobSON', 'INFORMACIJE', 'NAUKA U SRBIJI', 'SERVISI', and 'Pretraživanje časopisa'. The main content area is titled 'Medline' and features a green header with a '+' and '-' button. Below the header, the text reads 'MEDLINE' and 'Izdavač: US National Library of Medicine (NLM)'. A prominent green button labeled 'pristup MEDLINE-u' is circled in yellow. Below this, there is a section 'O bazi' with a paragraph describing Medline as a leading global bibliographic database in biomedicine. Another paragraph explains that a link to the full text is provided for each article from over 5,000 journals, but access is conditional on a subscription. A third paragraph states that every article is indexed by MeSH, a controlled terminology thesaurus. At the bottom, there is a section 'Časopisi iz Srbije indeksirani u MEDLINE-u' followed by a table listing three journals.

Medline

**MEDLINE**  
*Izdavač: US National Library of Medicine (NLM)*

**pristup MEDLINE-u**

**O bazi**

MEDLINE je vodeća svetska bibliografska baza iz oblasti biomedicinskih nauka. Dostupna je besplatno.

Pored bibliografskih podataka o svakom članku iz preko 5.000 časopisa, uspostavljen je i link do punog teksta. Dostupnost članka u punom tekstu uslovljena je pretplatom na elektronsku verziju časopisa (preko KobSON-a ili na neki drugi način).

Svaki članak se indeksira orednicama iz kontrolisanog terminološkog tezaurusa Medical Subject Headings - MeSH (<http://www.nlm.nih.gov/mesh/meshhome.html>), koji obuhvata preko 24.500 odrednica uređenih hijerarhijski na devet nivoa.

**Časopisi iz Srbije indeksirani u MEDLINE-u**

	Naziv časopisa	Period
1	Acta chirurgica Jugoslavica	1954-
2	Glas. Srpska akademija nauka i umetnosti. Odeljenje medicinskih nauka	1950-
3	Medicinski pregled	1950-

# Pretraživanje abstraktne baze Medline

The screenshot displays the PubMed website interface. At the top left is the NCBI logo. The main header features the PubMed logo and the text "A service of the U.S. National Library of Medicine and the National Institutes of Health" with the URL "www.pubmed.gov". On the top right, there are links for "My NCBI", "Sign In", and "Register". A navigation bar below the header lists various database categories: "All Databases", "PubMed", "Nucleotide", "Protein", "Genome", "Structure", "OMIM", "PMC", "Journals", and "Books". The search bar contains the text "PubMed" and a dropdown menu. To the right of the search bar are buttons for "Go" and "Clear", and a link for "Advanced Search". Below the search bar are buttons for "Limits", "Preview/Index", "History", "Clipboard", and "Details". The main content area contains two sections: "Welcome to PubMed" and "Introducing RRN".

**Welcome to PubMed**

The PubMed database comprises more than 19 million citations for biomedical articles from MEDLINE and life science journals. Citations may include links to full-text articles from PubMed Central or publisher web sites.

**Introducing RRN**

Access the latest research from Rapid Research Notes (RRN), a new archive of the National Library of Medicine. RRN provides permanent access to research shared through online resources for rapid scientific communication.

## Korišćenje Alert opcije

Izdavači naučnih baza podataka pružaju registrovanom korisniku mogućnost korišćenja *Alert* servisa. Ta opcija Vam omogućava da sačuvate korišćene upite kako biste ih kasnije ponovo izvršavali. Osim toga, možete ih koristiti kao zahtev za periodično slanje izveštaja o novodotatim člancima koji odgovaraju tim upitima.

Da biste koristili ovu pogodnost neophodno je da korisnik otvori svoj lični nalog (regstruje se) na svakom servisu pojedinačno. Te registracije su besplatne i međusobno nezavisne i nemaju nikakve veze sa KoBSON nalogom.

Postoji nekoliko tipova Alerts obaveštenja:

1. *Search Alerts* – obaveštenja vezana za pretrage. Ako korisnik odluči da sačuva određenu formu i sadržinu pretrage (npr. konkretnu konfiguraciju ključnih reči i imena autora po kojima je pretraživao bazu, slika ispod), ima mogućnost da putem Alerts aplikacije konfiguraciju konkretne pretrage sačuva, a da mu servis automatski šalje obaveštenje na e-mail adresu kada god se u bazi pojavi neki novi članak koji odgovara kriterijumima pretrage.
2. *Volume/Issue Alerts* – obaveštenja vezana za nove brojeve i sveske časopisa. Korisnik može da izabere časopise za koje želi da dobija obaveštenja kada god izađe nova sveska časopisa, naravno pod uslovom da se taj časopis referiše u bazi.
3. *Citation Alerts* – obaveštenja vezana za citiranje izabranih članaka. Korisnik može da traži da mu se za određene članke šalju obaveštenja kada god se u bazi pojavi neki novi rad koji citira izabrani članak.

## Šta je RSS?

RSS (Really Simple Syndication) predstavlja aplikaciju za automatsko preuzimanje podataka sa internet sajtova. Uz pomoć RSS aplikacija moguće je pratiti promene na web lokaciji od interesa bez posećivanja samog sajta. RSS automatski preuzima podatke o promenama na sajtu i obaveštava korisnika o njima. Ako se na sajtu pojavi neka nova vest, tekst ili neki drugi sadržaj, korisnik dobija informaciju o tome.

Postoje dva preduslova da bi RSS funkcionisao:

1. Da web sajt ima RSS aplikaciju, tj. da je moguće preuzimati informacije na ovaj način sa njega.
2. Da korisnik ima aplikacije za čitanje RSS-a, kao i da određenu web lokaciju unese u listu sajtova za RSS informacije.

Ove aplikacije se mogu besplatno preuzeti sa Interneta.

Za istraživača koji želi da prati određene naučne časopise u elektronskoj formi (npr. preko KOBSON-a), RSS predstavlja odlično rešenje, jer se sve promene, tj. pojavljivanje novog broja i novih tekstova, automatski detektuju i informacija stiže direktno korisniku, štedeći na taj način njegovo vreme.
