

## Data Reload

Following the release of the JCR data published in June 2023, we received missing materials whose absence had prevented journals from receiving a Journal Impact Factor, as well as to correct metrics for a small number of journals. The 2022 JCR data (2023 release) are now complete and all updates have been fully incorporated into the product.

After 2022 JCR data had been finalized we became aware that the ***Korean Journal of Parasitology*** should have been listed with the following metrics:

KOREAN J PARASITOL

2022 Journal Impact Factor: 1.4

2022 5-year Impact Factor: 1.5

Clarivate regrets the omission; however, these may be considered official JCR data.

Please note that this journal will also be listed in the 2023 data (2024 release) with a Journal Impact Factor, and the new title, ***Parasites, Hosts and Diseases*** will be listed with an Immediacy Index only.
