# Achievement

We designed and published new KoBSON webpage which is responsive – adjusted for all devices (desktops, tablets, and phones). Responsive Web Design can resize, hide, shrink, enlarge, or move the content to make it look good on any screen:

Serbia

KoBSON

# How it was done

- We made requirements and instructions, and hired IT company for this job. NLS paid all expenses from commission fee (from State budget – acquisition + commission fee for Library )
- They offered us several designs, we choose one.
- We have a new logo, carousel for the most used services, multimedia guidelines, federated search (EDS) for all subscribed content.

# Advice or challenge

- Keep pace with technological progress, innovative solutions and users needs
- We had a lot of comments, good 😊 and bad 😞, decreasing statistics in a first month
- After a while users get used to new platform and now statistics are even better
- Keep going, do not give up
